

EBS Symphony

MYOB Exo

EBS Symphony is an industry leading system integrated with MYOB EXO.

Overview

EBS Symphony is a fully customizable solution encompassing the full life cycle of Sales, Purchasing and Stock.

Out of the box functions include:

- Multi-bin operations.
- Multi-level BOM's.
- Customisable reporting suite.
- Integrated Point of Sale and banking functions.

CRM and out-bound sales functionality.

When To Consider

- When the sales input process needs to be quicker.
- When purchasing requirements for the company needs to be stream lined and based on real-time data.

Who Should Consider?

- Businesses wanting to extend their inventory function.
- Companies wanting to implement tighter back order controls.
- If stock management processes have become outdated.
- Tighter controls on stock management are required to ensure optimum cash flow within the business.
- Businesses with multi-discipline staff who require access to multiple software components from one application.

Implementation Process

1. Complete an information form so we can configure EBS Symphony to suit your requirements.
2. Provide access to your MYOB EXO software so we can setup the integration.
3. Review of self-training documentation and provision of formal training for all personnel involved in the business processes.

Email sales@exobiz.com.au to arrange a demo.
